Career Profile

Motivated mobile and web developer with strong proficiency in JavaScript, React, and React Native, complemented by foundational knowledge in Python. Proven track record of delivering high-quality mobile applications and web frontend solutions. Experienced in designing intuitive user interfaces and developing full-stack features. Successfully completed multiple semester projects and a comprehensive Final Year Project demonstrating practical expertise in mobile application architecture, responsive design, and cross-platform development. Seeking opportunities to leverage technical skills and create impactful digital solutions.

Academic Background

Bachelor of Science in Computer Science – University of Mianwali

CGPA: 3.30 / 4.0

Intermediate – Abdul Razzaq College, MM Alam, Mianwali

Grade: A1 | Obtained: 902 / 1100 marks

Matric – Abdul Razzaq Fazaia College, MM Alam

Grade: A1 | Obtained: 920 / 1100 marks

Relevant Coursework: Object Oriented Programming (OOP), Mobile Application Development, Web Development, Data Structures and Algorithms (DSA), Database Management

Key Projects

- **BinBuzz – Smart Waste Management System**
  Final Year Project (FYP) | React Native | Multi-Module Application

  Developed a comprehensive waste management system comprising three interconnected mobile applications: Driver App, Sweeper App, and Zonal Manager App.
  Driver App: Enables waste collection drivers to receive bin collection assignments, track collection routes, update completion status, and manage daily schedules with real-time notifications.
  Sweeper App: Allows street cleaners to receive daily assignments, report bin location issues, upload completion proof, and communicate with zonal managers.
  Zonal Manager App: Provides supervisory control to assign tasks, monitor team performance, view collection reports, and manage operational efficiency across zones. Implemented intuitive UI/UX design using React Native for seamless cross-platform performance on iOS and Android.
  Integrated backend connectivity for real-time data synchronization and role-based access control.

- **Movie App**
  React Native | UI/UX Design

Developed a mobile application for browsing movies with detailed information, ratings, and user reviews.
Designed professional UI/UX interface using React Native best practices for enhanced user engagement.
Implemented search and filter functionality to help users discover movies based on genres, ratings, and release dates.

- **Calculator App**
  React Native & Node.js | Backend Integration

  Built a mobile calculator application with advanced mathematical operations using React Native for frontend.
  Integrated Node.js backend to handle complex calculations and maintain operation history.
  Designed intuitive interface with clear display, history tracking, and responsive button layout.

- **Online Shopping System**
  Semester 2 Project | HTML • CSS • JavaScript

  Developed a fully functional e-commerce web application with product catalog, shopping cart, and checkout functionality.
  Implemented product listing with images, descriptions, and pricing information for enhanced shopping experience.
  Built responsive shopping cart system allowing users to add/remove items, view quantities, and calculate totals dynamically.
  Created checkout interface with order summary and confirmation features using vanilla JavaScript.
  Designed responsive frontend layout ensuring compatibility across desktop and mobile devices.

Skills and Technologies

Web Frontend: HTML, CSS, JavaScript
Mobile Development: React Native
Frameworks & Libraries: React, React Native
Backend: Node.js, Python (Foundational)
Tools & Technologies: VS Code, Android Studio, WebStorm, IntelliJ IDEA
Soft Skills: Problem Solving, Team Collaboration, UI/UX Design Principles

Certifications

Python Programming Course – Hadi E-Learning

Recommendations

Will be provided on demand.
